2022 -2023 学年第 一 学期

《生物化学 A》试题（B 卷）

课程代码 **BK035007** 考试方式 **闭卷** 考试时长 **100** 分钟

姓名_____学号_____教学班号_____ _____专业_____级_____班

题 号	一	二	三	合计
满 分	20	45	35	100
得 分				
阅卷人				

一、 Write Out the Chinese Name of the Following Biochemical Terms.写出下列符号或名词的中文名称。(20 points, 1 for each)

English name	Chinese name
1. m^5C	
2. DHU	
3. Asp	
4. FAD	
5. CoA	
6. Pyr	
7. GSH	
8. UDPG	
9. SSB	
10. PCR	
11. Nucleoside	
12. Pyrimidine	

注：考试期间试卷不允许拆开。

13. Proton gradient	
14. Reversible covalent modification	
15. Hydrogen bond	
16. Ampholytes	
17. Ribozyme	
18. Allosteric effect	
19. Okazaki fragments	
20. Gluconeogenesis	

二、Explain the following terms. （45 points, 3 for each. 可用汉语或英语回答）

1. Hyperchromic effect

2. Nucleic acid hybridization

3. Domain

4. Isoelectric point of protein

5. Zymogen activation

6. Isoenzyme

7. Semi-discontinuous replication

8. Promoter

9. SD sequence

10. Respiratory chain

11. Embden-Meyerhof pathway

12. Essential fatty acids

13. β-oxidation of fatty acids

14. Reverse transcription

15. Synonymous codon

三、Answer the Following Questions. (35 points. 可用汉语或英语回答）

1. Please briefly describe the structural characteristics of B-type double helix DNA. (6 points)

2. What are the mechanisms of enzymes to achieve efficient catalysis? (6 points)

3. What are the contents of post-transcriptional processing of mRNA precursors? (6 points)

4. What substances are the main components of protein synthesis system? What are their functions? (6 points)

5. Briefly describe the significance of tricarboxylic acid cycle. (5 points)

6. Briefly describe the process of complete oxidative decomposition of fatty acids through β-oxidation? (6 points)
